

Supplying dentistry to the very highest of standards

AT Southside Dental Care, we carry-out our range of treatments using the very latest in technology.

We have a range of equipment to ensure our treatments and results are to the highest standards.

Our range of specialist equipment includes digital X-rays, intra-oral cameras, latest NiTi rotary files (for endodontic treatment), implant and laser bleaching machine and cosmetic dentistry.

Cosmetic or aesthetic dentistry is a way of improving your appearance. There are now a large number of treatments that can safely and effectively straighten, lighten, re-shape and repair your teeth.

Dentures:

One of the available treatments to replace missing teeth is dentures. Depending on each patient's individual needs, the dentist will decide which of the different types of dentures will be most suitable.

Hygienist:

Southside Dental

One major cause of tooth loss is gum disease. Our hygienist will spend time with patients giving oral hygiene instruction and a thorough scale and polish.

Inman Aligner:

Until now, the alternatives to straighten front teeth involved either long and expensive orthodontic treatments or destructive and expensive restorative treatments, but with the arrival of the Inman Aligner, all that has changed.

Tooth Whitening:

Bleaching is the most effective way of making your teeth whiter, or a lighter shade. It will have the effect of making your teeth look cleaner.

White Fillings:

White fillings are made from composite resin that is bonded to the tooth. The tooth is prepared in a similar way to a normal filling.

Facial Rejuvenation:

Treatment with BOTULINUM TOXIN (BTX) (eg Botox, Dysport and Xeomin) and DERMAL FILLER - for sculpting and volumising.

We are a member of the Royal College of Surgeons of England and the British Dental Association (BDA). We are also registered with Lambeth PCT and the CQC (Care Quality Commission) and comply with their standards and the BDA's good practice.

Still Fixing, 11 years on

FIX IT Streatham is now branching out into watch repair.

Fix IT has been doing IT repairs and fixing computers in Streatham for the past 11 years.

Olu Osibo, the owner of Fix IT, has been joined by watch repair specialist Sinclair Thompson.

Mr Osibo said: "Mr Thompson worked in the kiosk at Debenhams as a sales repair consultant for approximately 14 years and is known to many people in and around the Clapham Junction area.

"Sinclair has worked for In-Time Watch Services as a horologist for approximately 16 years, repairing clocks, watches and jewellery."

Mr Thompson added: "We're masters of the art of watch, clock and jewellery repair with over 29 years experience working on major watch brands such as Cartier, Omega, Rolex, Longines, Tissot, Seiko, Citizen, and Casio.

"We are certified watch and jewellery repair specialists for network support who is accredited agents to most manufactures. We fit watch batteries to manufactur-

Sinclair Thompson, left, and Olu Osibo at Fix IT Streatham

ers' specification with a guarantee of 12 months on major repairs.

"We are proud to be known on the Streatham High Street for our excellent services in repairing watches and jewellery."

Most batteries can be fitted while customers wait, and are tested for moisture, dust and waterproofing for those who need extra security jumping in the pool or doing the washing up.

Mr Osibo said: "Our excellent customer service is second to none

and we go the extra mile in searching for those hard to get parts and discontinued items, especially watch straps for your older version watches.

"We also do a special call-out service for clocks and jewellery cleaning service within the comfort of your home.

"We look forward to being of service at our one-stop shop for phone repairs, consoles, Mac computers and any other gadgets."
